Agentic Marketplace

Browse our complete directory of autonomous engines and capabilities.

DISCOVERY HUB

INDUSTRY: ALL INDUSTRIES RETAIL & E-COMMERCE

Search for an agentic tool or capability to build or use...

The screenshot displays the Agentic Marketplace interface. At the top, there's a search bar with placeholder text "Search for an agentic tool or capability to build or use...". Below it, a navigation bar includes "DISCOVERY HUB", "INDUSTRY: ALL INDUSTRIES", and "RETAIL & E-COMMERCE". A large search icon is also present. The main area features a grid of eight cards, each representing a different tool:

- Profile My Data** (ALL INDUSTRIES): "Deep scan of data distributions, quality outliers, and statistical health check." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Clean My Data** (ALL INDUSTRIES): "Autonomous transformation agent to fix schema drift, nulls, and bad formatting." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Master My Data** (ALL INDUSTRIES): "Agent-led MDM to resolve record conflicts and establish golden truth records." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Customer Segmentation** (MARKETING & SALES): "AI clusters that identify and lift high-value cohorts based on behavioral logic." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Market Basket Analysis** (RETAIL & E-COMMERCE): "Identify purchase sequences and intent signals to drive next-best-action bundles." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Synthetic Control Group** (ALL INDUSTRIES): "Advanced AI twin modeling to measure lift and incrementality without true holdouts." Status: READY TO DEPLOY. Deployment link: DEPLOY AGENT >.
- Holdout Control Group Planner** (ALL INDUSTRIES): "Statistically significant sample generation for incremental lift and pilot testing." Status: FREE PUBLIC USE. Deployment link: DEPLOY AGENT >.
- Lead Priority Agent** (MARKETING & SALES): "Scans CRM interactions and identifies high-intent leads for sales follow-up." Status: CLAIM TO BUILD. Deployment link: DEPLOY AGENT >.

CLAIM TO BUILD

MARKETING & SALES

Brand Watchdog

"Real-time social sentiment analysis with autonomous response drafting."

Agentic Marketplace

Browse the complete directory of 22 autonomous capabilities.

The screenshot shows the Agentic Marketplace interface. At the top, there's a search bar with placeholder text "Search for an agentic tool or capability to build or use...". Below it are filters for "INDUSTRY" (set to "ALL INDUSTRIES") and "RETAIL & E-COMMERCE"). A large list of tools is displayed in a table format:

AGENTIC CAPABILITY	INDUSTRY	STATUS	ACTION
Customer Segmentation "Beyond charts: AI clusters that identify and lift high-value cohorts..."	MARKETING & SALES	READY TO DEPLOY	CONFIGURE >
Lead Priority Agent "Scans CRM interactions and identifies high-intent leads for immediate..."	MARKETING & SALES	READY TO DEPLOY	CONFIGURE >
Brand Watchdog "Real-time social and review sentiment analysis with autonomous..."	MARKETING & SALES	BETA	CONFIGURE >
Budget Realocator "Agent that shifts ad spend between channels based on hourly ROAS..."	MARKETING & SALES	CLAIM TO BUILD	SIGNAL INTEREST >
Market Basket Sequence "Identify purchase sequences and intent signals to drive next-best..."	RETAIL & E-COMMERCE	READY TO DEPLOY	CONFIGURE >

Each tool gets its own page under agensium.ai/tools/<tool-name>, but all tools remain part of one unified platform. For example:

- agensium.ai/tools/master-data-management
- agensium.ai/tools/synthetic-control
- agensium.ai/tools/market-basket
- agensium.ai/tools/customer-segmentation
- agensium.ai/tools/data-profiling
- agensium.ai/tools/data-cleaning
- agensium.ai/tools/experimental-design

CTA 1

THE MAKER PATH

Let's Build Your Agent Together.

Stop wrestling with prompts. Tell us what you want to create, and our team will provide the architecture, infrastructure, and expertise to launch a production-ready agent.

Speed to Market
Prototype in days.

Enterprise Grade
Secure and scalable.

Managed Infra
No server headaches.

Multi-Modal
Text, Voice, or Action.

YOUR NAME

WHAT ARE WE BUILDING?
Describe the problem your agent solves...

TARGET LAUNCH
Immediate / ASAP

Start Your Build →

By submitting, you're reserving a spot for a free architecture strategy session with our product team.

CTA 3

The screenshot shows the 'TECHNICAL ONBOARDING' section of the Agensium website. At the top left is the Agensium logo. At the top right is a 'Back to paths' link. Below the header, the main title is 'Integrate Agensium Into Your Stack.' A sub-section below it says 'Evaluate our runtime, discuss rate limits, and plan your integration with direct support from our engineering team.' To the left, there are two callout boxes: one for 'Direct Engineering Support' (consulting with the core engine team) and another for 'High-Throughput Runtime' (designed for 100k+ concurrent sessions). To the right is a large form for requesting integration support, containing fields for 'LEAD ENGINEER' (Name and Work Email), 'CURRENT STACK' (e.g. Node.js, Python/FastAPI, AWS Lambda), and 'INTEGRATION GOAL' (a text area for describing data flow or agent behavior). A prominent 'Request Integration Support →' button is at the bottom of the form. Below the form are three small checkboxes: GDPR, SLA, and TLS 1.3. A vertical sidebar on the right features a navigation menu with icons for Home, About, Products, Services, Pricing, and Contact.

TECHNICAL ONBOARDING

Integrate Agensium Into Your Stack.

Evaluate our runtime, discuss rate limits, and plan your integration with direct support from our engineering team.

Direct Engineering Support
Consult with the team that built the core engine.

High-Throughput Runtime
Designed for 100k+ concurrent sessions.

Bottom of home page:

The screenshot shows the bottom section of the Agensium homepage. It features a central heading 'Dashboards are History' with the subtitle 'THE PIVOT'. Below this, there are two comparison tables: 'THE OLD STANDARD' on the left and 'THE AGENTIC STANDARD' on the right. The 'OLD STANDARD' table lists: TIME TO VALUE (3-6 Months), UNIT COST (\$100,000+), INTERACTIVITY (Static Filtering), and ACTIONABILITY (Passive Reporting). The 'AGENTIC STANDARD' table lists: TIME TO VALUE (2 Weeks), UNIT COST (\$2,000), INTERACTIVITY (Autonomous Reasoning), and ACTIONABILITY (Executed Outcomes). At the bottom, there are three callout boxes: 'SOC2 TYPE II' (Enterprise-grade security and encryption across the entire agentic pipeline), '99.99% UPTIME' (Distributed architecture ensures agents execute around the clock without interruption), and 'API-FIRST' (Built for developers. Integrate agentic logic into your existing stack in minutes). A vertical sidebar on the right features a navigation menu with icons for Home, About, Products, Services, Pricing, and Contact.

Dashboards are History

THE PIVOT

THE OLD STANDARD	
⌚ TIME TO VALUE	3-6 Months
💲 UNIT COST	\$100,000+
🌟 INTERACTIVITY	Static Filtering
💡 ACTIONABILITY	Passive Reporting

THE AGENTIC STANDARD	
⌚ TIME TO VALUE	2 Weeks
💲 UNIT COST	\$2,000
🌟 INTERACTIVITY	Autonomous Reasoning
💡 ACTIONABILITY	Executed Outcomes

SOC2 TYPE II

Enterprise-grade security and encryption across the entire agentic pipeline.

99.99% UPTIME

Distributed architecture ensures your agents execute around the clock without interruption.

API-FIRST

Built for developers. Integrate agentic logic into your existing stack in minutes.
